

---

KirtBag Carving Mix is an “ad-pac” used to convert an 80 lb bag of standard type S mortar into a high performance vertical carving mix. KirtBag Carving Mix can be used for interior or exterior applications without any modifications.

- Used interior or exterior
- The most workable mix on the market
- Plenty of work time, 4 to 5 hours
- Takes texture and stamping excellent
- Can be stacked on the wall up to 4” in one pass
- Has a putty like consistency
- Dries to a light buff color
- Excellent staining qualities
- Very strong, dense mix

**Coverage:** Once you have mixed one bag of KirtBag Carving Mix to one 80 lb bag of type S mortar, you will yield approx. 8-9 sq. ft. at 1 1/2” thick.

**Instructions:** Start with 1 1/2 gallons of clean water in the mixer. Add one full bag of KirtBag Carving Mix to water and mix well. Add one 80lb bag of Type S mortar, mix well until fully blended. Add water if needed to achieve your personal consistency. Let mix stand for 5 minutes, then remix.
