

RECLAIMED TIMBER FORMLINERS

Specs on making legs for table or bench.

To make table legs for standard height or bar-height table use four forms per leg.

To make short legs (less that 25" high) for bench or coffee table height, two forms cut in half will give you four forms, which will make one leg.

The outside measurement of the legs can be changed by moving in the forms as shown below.

Part numbers: TML2149A and TML2149B
