The colors shown are an approximate representation of concrete with a flat trowel finish and sealed with DecoCrete's Diamond Shine solvent based sealer. DecoCrete is not responsible for application methods, finishing techniques, or any other variables that cannot guarantee the final appearance to be an exact match. Texturing or other finishing techniques such as troweling or brooming, slight variation in raw materials, and the use of sealers may produce color variations. DecoCrete strongly recommends that a representative jobsite sample be made for each product used.

# Antique Release Agent

## What is the release color?

This is the color that goes into all the low lying areas and “grout” lines of your pattern, creating a two-toned antique look to enhance any stamped concrete surface.

Without Release

With Release

If you want to see a big contrast between your base and release color, chose a darker release than your base. For less contrast, pick a release color that is closer to your base color.
