

SURE BOND

Concrete Bonding Adhesive

PRODUCT DESCRIPTION

Sure Bond is a concentrated acrylic bonding adhesive designed to bind cement-based products and concrete overlay systems to a variety of substrates. **Sure Bond** offers improved flow and is easy to use. **Sure Bond** provides excellent adhesion for both interior and exterior Jobs. The high solids formula can be diluted with water for a wide range of applications.

TECHNICAL INFO

- Solids50%
- Wet Appearance.....Milky White
- Application Temp.....40°F - 85°F
- Concrete Adhesion....Excellent
- Coverage200sq ft-250sq ft per gallon when diluted 1:1 with water
- Clean up.....Water

RECOMMENDED APPLICATIONS

- +Concrete overlay systems
- +Concrete repair products
- +Stuccos & masonry
- +Styrofoam
- +Other cementitious systems where a high strength bond is required.

QUICK FACTS

- + Excellent bonding properties for cementitious products.
- + Low viscosity for easy spraying.
- + High solids content is dilutable for many different applications.
- + Apply with sprayer, roller, or brush
- + For interior or exterior use.

SURE BOND

Concrete Bonding Adhesive

INSTRUCTIONS FOR USE

Mix Deco-Crete Sure Bond 1:1 with water and apply to a prepared concrete slab with a pump-up style sprayer. Completely saturate the slab and back-roll with a 3/8"-1/2" nap roller. Allow all puddled areas to dissipate, so the substrate becomes SSD*. If you allow sure bond to completely dry on the surface, lightly misting with water is recommended if applying overlay in direct sunlight or on hot days.

If applying multiple layers of overlay product, Deco-Crete recommends re-priming between coats.

Note: SSD stands for Saturated Surface-Dry. SSD describes a condition that a concrete surface must be brought to when a cementitious product is applied. The surface is SSD when the substrate is saturated, but the outer surface is devoid of standing liquid.*

PRECAUTIONS & LIMITATIONS

- Sure Bond will freeze. It is recommended to store in an area between 50°F and 85°F.
- Do not apply Sure Bond as a cure and seal or any other form of concrete coating.
- Usage rates depend upon many variables including dilution rate, application method, substrate porosity, etc.

* Deco-Crete Supply is not responsible for application methods, finishing techniques or any other variables that cannot guarantee the final appearance. Deco-Crete Supply recommends that a representative job site sample be made for each product used.

SHELF LIFE

+ Sure Bond has a shelf life of one year in it's original, sealed, unopened container.
